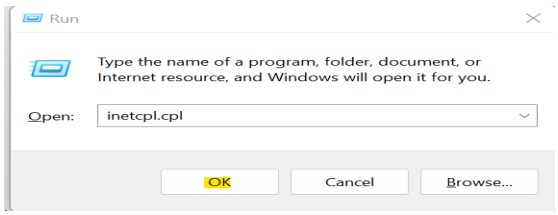
Proxy setting check for Office / Home Users

Genc URL → https://cognizant.tekstac.com

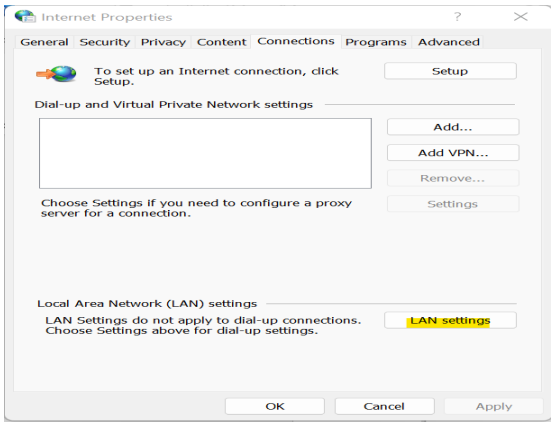
Issue 1: Genc application access from cognizant office network (LAN/WIFI)

1. Interviewer and Interviewee must add the below Genc Urls domains in the endpoint internet proxy bypass list to access the GenC application from cognizant LAN/Wi-Fi network.
2. **"chime.aws;*.chime.aws;*.sdkassets.chime.aws;*.amazonaws.com;*.s3.amazonaws.com;*.tekstac.com; "**
3. Follow the steps below steps.
   Start →Run → inetcpl.cpl → Connections → LAN Setting → Proxy Server → Advanced → Exception

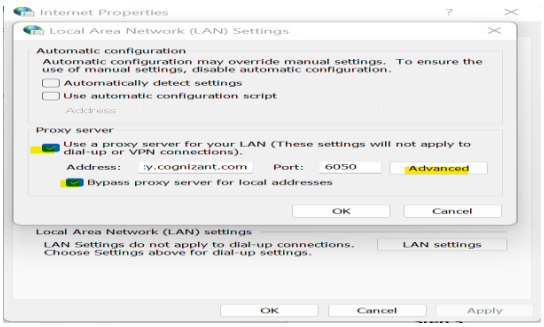
Step 1



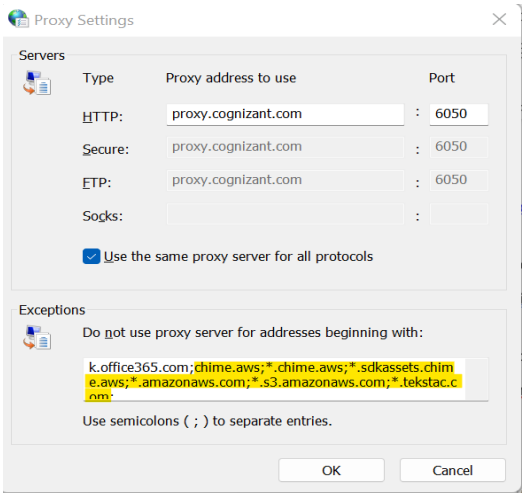
Step 2



Step 3



Step 4



Note:

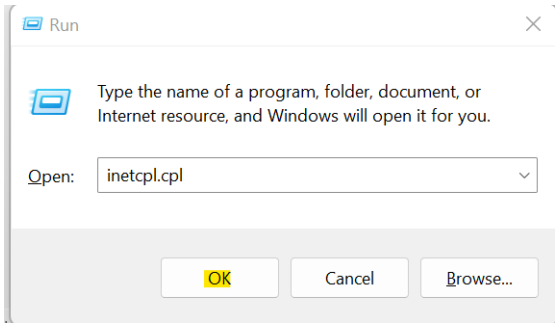
- ✓ Please disconnect the LAN Cable and re-plugin to get the network connection.
- ✓ **Please do not remove any URLs from existing exceptions list in setting.**

Scenario 2: Genc application access from home network (Home broadband, Data card, Hotspot, Tethering)

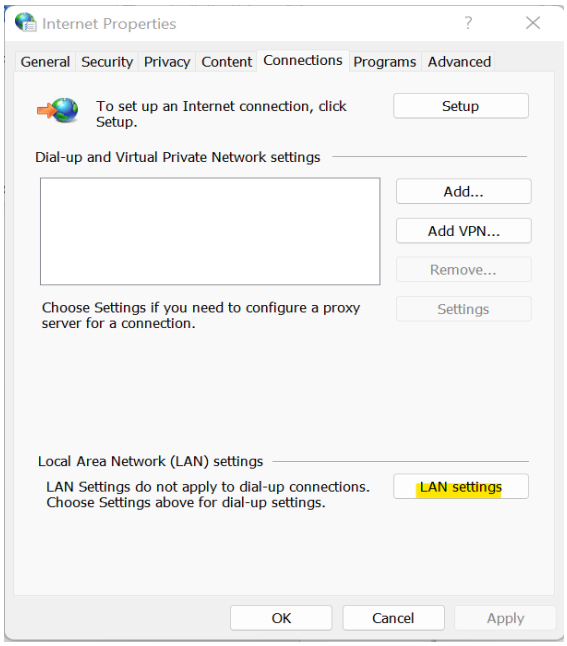
1. Interviewer and Interviewee must disable the proxy setting in the laptop internet settings.
2. Follow the steps below steps.

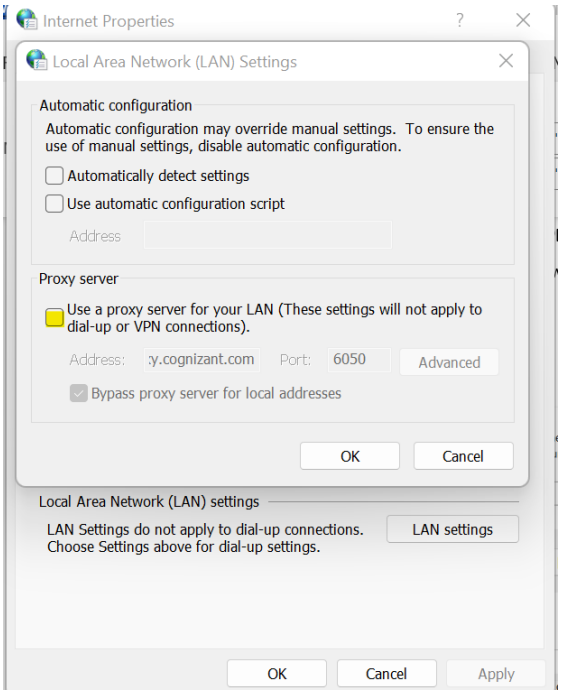
   Start →Run → inetcpl.cpl → Connections → LAN Setting → Proxy Server

Step 1



Step 2





Make sure tick mark in yellow shaded box is disabled.

Step 3

Note : Any network performance issue faced by the user who are connected from home (broad band, Wifi, Hotspot, tethering) should be dealt with their internet service provider.
